

MysteryTwister C3

THE CRYPTO CHALLENGE CONTEST

NUMBER SEQUENCE – PART 5

Author: River Edis-Smith

April 2012

See if you can work out the missing three numbers in the following sequence:

223-?-221311-?-2221132112-?-...

In your answer please separate the numbers only by a comma.

Hint: In contrast to most other number sequences, this solution has nothing to do with the values but rather with the structure of the numbers.
